Daniel Weiss

Staff Software Engineer

daniel.weiss@example.com | +1 416 555 0182 | Toronto, ON

Summary

Staff engineer with fourteen years across data infrastructure and platform teams. I set technical direction for streaming systems and grow senior engineers.

Experience

Northbeam — Staff Software Engineer (2021–Present)

- Set the architecture for a Kafka and Spark streaming platform processing 2 TB a day.
- Led a 12-engineer migration from self-managed clusters to GKE on GCP.

Quillstack — Engineering Lead (2018–2021)

- Managed a team of seven building the billing platform in Scala.

Quillstack — Senior Software Engineer (2016–2018)

- Designed gRPC services in Kotlin for usage metering.

Atlas Freight — Software Engineer (2013–2016)

- Built Java services for freight pricing on PostgreSQL.

Pixelmint — Junior Developer (2012–2013)

- Maintained a PHP e-commerce site and its MySQL database.

Education

B.A.Sc., Software Engineering, University of Waterloo, 2012

Skills

Core: Scala, Java, Kotlin, Kafka, Spark

Platform: k8s, GCP, Terraform, gRPC, PostgreSQL
